

Wedding Packages - Platinum	
This is the platinum package; you have a massive wedding that demands everything and this is the package for you. Two full time assistants and myself will cover the entire wedding from beginning to end with no questions asked. Plus a video of just about everything; everything!	
Contents	Description
Myself All Day	Laurence Simmonds at your service. I'm here to take all of the memories of your special day and turn it into a video that you'll love and share with your family and friends. I'll show up early in the morning and leave late into the night with coffee in hand.
Two Assistant Videographers Full-Time	The next best thing since sliced bread, the cellphone, or the internet. Two full-time assistant videographers to help gather all the shots you desire.
Three Cameras; One DSLR & Two Camcorders	DSLR's provide excellent video quality in a small form factor while the camcorder has excellent video and excellent audio built in. It may not be your moms iPhone but it'll get the job done.
6 - 10 Minute Highlight Video	When your wedding day comes to an end it doesn't mean all the small details go with it. This highlight will show a quick look into your wedding day with all the laughing, crying, cheering, beauty, and drunk people. Just kidding it also has your creepy uncle.
30 - 60 Minute Long Video	The entire ceremony will be recorded and edited for you along with the highlight video. This will be your wedding day with all the vows, tears, and laughter. Watch out for those speeches though.
Minute Instagram Video	Sometimes you want to share a video on a platform that only lets you post a minute of video. Well I've got you covered with the minute long instagram video! It's a minute of the best clips for you to share to your family, friends, and coworkers.
One Re-edit of the Highlight and Long Video	You've received your highlight and you've just finished watching it and saw two things that bothered you. Like your weird aunty eating in the background while your friends and you dance. Thankfully we have editing software to cut, slip, mask, and crop. This doesn't mean I'm changing the entire video; it means you wont have to worry about asking me as I dont charge for minor edits.
Three Week Turn Around Time	Weddings are very, very long. This means there's hours of footage to look through and find the best parts. You will have your video, but while you wait, relax to the soothing sounds of the cool breeze. https://youtu.be/c3fZGnKZke4?t=1724

Engagement Photo or Video Shoot (Optional)	You've placed a deposit and want to see how I work before the big day. Why not find out by having an engagement photo or video shoot? We will go to a place of your choosing and create a minute long instagram video or have a nice photo shoot that leaves you with 10 edited photos. This is entirely optional but why pass on it when it's a fun experience.
Drone (Optional)	You want drone footage? Awesome, I can help you with this. Unfortunately the FAA exists and they placed regulations on drones. This means they can only be flown in select areas. If your wedding is hosted far away from civilization then say no more. But in all seriousness I would have to look at where the wedding location is on a map to better determine if its safe.
Everything shot by the assistant(s) and me is yours as long as you provide an external harddrive.	
Total Cost = \$4000
